is proud to host

**Electrical Rebuilders Association
Technical Education Series**

Three All New Classes

This three part course is designed to address the need for technical training in the electrical rebuilding industry. Don't miss this opportunity to acquire high quality formal training for your employees at an affordable price. The future of your business is in your hands.

May 5, 2006 Friday Evening 6:30pm—9:00 pm

How Generators, Starters & Alternators Really Work

This class is a great refresher for the experienced rebuilder or an introduction to the theory behind electrical rebuilding for new employees. Hands-on demonstrations will be used to help students visualize electro-magnetic fields, generation of current and voltage & amperage.

May 6, 2006 Saturday Morning 8:30 am—Noon

Information on the Latest Charging & Starting Systems

This information packed class is designed to help you and your employees stay abreast of the very latest changes in alternators and starters. It will cover all the new systems and include a handout to update your Technical Service Manual.

May 6, 2006 Saturday Afternoon 1:00 pm—3:00 pm

Solving Rebuilding Problems

This class will cover rebuilding problems in specific areas with emphasis on answering the questions of attendees. Learn proper component testing methods that will save you time and money every day. Bring your questions!
